## Discussion problem assignment:

第一题:通过网络学习音调的概念,找到乐器的不同音调对应的频率。

第二题: Given a signal

to find the energy of x(2t+1), try the following two

different ways.

(1) find and sketch the signal y(t) = x(2t+1) using signal time transformation, then find the energy of the new signal

(2) Compute

based on variable transform from calculus.

Check whether you have the same result.

## 第三题:

- (1) Compute the energy of the signal  $x(t) = e^{-t}, t > 0$
- (2) Compute the average power of the periodic signal  $x(t) = \cos(pi * t)$  over a period

Homework assignment for Chapter One:

1.3, 1.6, 1.9, 1.13, 1.14, 1.15, 1.16, 1.21(b,c), 1.31

## 注意:关于作业的要求

作业按章布置和提交,在每章开始时,会布置这一章的作业。

教材每章后的作业题目,包括基本题目和中等题目、以及提高题目。作业的布置,选择对理解重要知识 点和概念有帮助的题目。

作业的提交,将会在一章结束后一起提交。建议同学们,根据上课内容,及时完成相应的作业,便于理 解每次课的关键知识点。
