Discussion problem assignment:

问题一:

计算以下两个信号的卷积结果:  $x(t) = e^{3t}u(t)$ ,  $h(t) = e^{-2t}u(t)$ 

A:

答案应该是课上讲的

$$x(t) = e^{3t}u(t) \rightarrow y(t) = \frac{1}{5} \left[ e^{3t} - e^{-2t} \right] u(t)$$

第二题:

定义两个连续时间实信号 x(t)和 y(t)的互相关函数是

$$\phi_{xy}(t) = \int_{-\infty}^{+\infty} x(t+\tau)y(\tau)d\tau \, \text{FI} \, \phi_{yx}(t) = \int_{-\infty}^{+\infty} y(t+\tau)x(\tau)d\tau$$

证明互相关函数与卷积不同,有 $\phi_{xy}(t) = \phi_{yx}(-t)$ 。

答案:

$$\phi_{xy}(t) = \int_{-\infty}^{+\infty} x(t+\tau)y(\tau)d\tau$$

$$\phi_{yx}(t) = \int_{-\infty}^{+\infty} y(t+\tau)x(\tau)d\tau \xrightarrow{\tau'=t+\tau} = \int_{-\infty}^{+\infty} y(\tau')x(\tau'-t)d\tau' = \phi_{xy}(-t)$$
